Port Elizabeth, South Africa

PROFESSIONAL SUMMARY

Software developer experienced in building scalable web applications and enterprise systems using C# (.NET), Java (Spring Boot), TypeScript/Angular, PHP, and SQL. Skilled in REST API design, custom WordPress development, and database optimization. Delivered production systems including a Microsoft Graph API booking platform, internal enterprise portals, and WooCommerce e-commerce stores, following Agile methodologies and CI/CD workflows.

EXPERIENCE

Junior Software Engineer | **Wirk Pty** *July 2024 – Present*

Full-stack development across C# .NET, Java Spring Boot, PHP, TypeScript/Angular, and WordPress for enterprise and commercial clients

- Contributed to a C# .NET and Angular/TypeScript company portal covering daily canteen ordering, office and desk allocation, leave visibility, and a real-time view of who is in office, working remotely, or away.
- Contributed to a C# .NET and Angular/TypeScript internal ticketing system where project managers assign tickets to developers, developers track time and progress, and the team manages workloads in real time.
- Developed features for an internal workplace management system built with Java Spring Boot enabling desk booking, WFH scheduling, and staff clock-in/out used company-wide.
- Diagnosed and resolved production issues across full-stack systems, debugging Angular frontends, C# .NET and Spring Boot APIs, PHP backends, and database layers.
- Improved database performance by 40% through SQL query redesign, indexing, and caching across MySQL and SQL Server; reduced load times on a legacy PHP system from 5 minutes to under 10 seconds.
- Built custom web platform extensions in PHP, including a WordPress booking plugin integrating the Microsoft Graph API to surface Outlook/Teams availability and automate meeting scheduling while preserving calendar privacy.
- Built multiple production WordPress platforms including WooCommerce e-commerce stores and a large-scale website for a client in the business sector, developing custom PHP themes, plugins, and integrations.
- Automated operational workflows using Power Automate and developed Power BI dashboards providing real-time operational insights.
- Collaborated in Agile/Scrum workflows using GitLab and CI/CD pipelines, contributing to code reviews and sprint delivery.

Software Development Intern | **TaaU Africa** - *April 2024 – June 2024*

AI-powered Learning Management System built on React, ASP.NET Core, and SQL Server

- Contributed to an AI-powered Learning Management System built with React, ASP.NET Core, and SQL Server.
- Built frontend features using React and Tailwind CSS, improving accessibility and learner interaction across web and mobile devices.
- Developed ASP.NET Core REST APIs integrated with React and SQL Server, implementing JWT authentication, role management, and tested endpoints using Postman.

EDUCATION

National Diploma in Information Technology (Software Development) - *2020 – 2023*
Nelson Mandela University • Port Elizabeth, South Africa

National Senior Certificate (Matric) - *2019*
Bizana High School • Bizana, South Africa

TECHNICAL SKILLS

Languages: C#, Java, PHP, JavaScript, TypeScript, SQL, HTML5, CSS3/SCSS

Frameworks & Platforms: .NET Core, ASP.NET Core, Spring Boot, Angular, React, Node.js, NestJS

Databases: MySQL, SQL Server, PostgreSQL, MongoDB, Redis

Backend & APIs: RESTful API Design, JWT Authentication, Clean Architecture, CQRS, Swagger/OpenAPI, Stripe Payments, Webhooks, Postman, Microservices

CMS & Web Development: WordPress, custom themes & plugins, WooCommerce

DevOps & CI/CD: Git, GitLab CI/CD, GitHub, SourceTree, Docker, Vercel, Render
